

Basic controls

For basic control over heating and/or hot water

Basic Controls

Maximise energy and fuel savings

With the introduction of condensing technology, boilers have continued to increase in efficiency with most current appliances able to reach over 90% efficiency. However, the technology within boilers is now so advanced that, even with future developments, there is little chance of boiler efficiency percentages increasing much further.

The one area that can still help maximise the efficiency and overall performance of the boiler is the correct use of a control. Even with average efficiencies now reaching over 90%, this can be increased by a further 3% - with the simple addition of a weather compensation control for example.

Choosing the right control

There are a number of different controls available so establishing the most suitable one for your heating requirements may be confusing. Vokèra provide a range of controls that can be used with combi and system boilers and include basic mechanical clocks, room thermostats, programmable room thermostats and the Vokèra 'Intelligent Control' range that incorporates the most advanced technology available - such as weather compensation and OpenTherm protocol.

For more information on the Vokèra Intelligent Control range please see the 'Energy Saving Control' leaflet

Basic Controls

Mechanical clocks and digital programmers allow basic control over the heating and/or hot water requirements with the ability to set one time period only.

Mynute HE 7 day digital programmer

Code: 514

Suits all main heating and hot water needs when the boiler is connected to a water cylinder. It can be programmed to control the heating and hot water timings at different times each day* for a 7 day period.

Built-in ready made program to suit most customers needs.

7 day battery back up.

Backlit display.

Simple single button to adjust British Summer Time.

Allows for the heating and hot water* to be controlled independently of each other.

*When connected to a water cylinder.

Unica HE 24 hour mechanical clock

Code: 433

Allows control over boiler heating timings with continuous, timed and off modes of operation.

Simple to install with pre-fabricated loom.

Continuous, timed and off mode.

Simple operation.

This clock can also be used with Mynute HE where an existing control for the hot water tank is in operation.

Compact A 24 hour mechanical clock

Code: 20025081

Allows control over boiler heating timings with continuous, timed and off modes of operation.

Simple to install with pre-fabricated loom.

Continuous, timed and off mode.

Simple operation.

Only available as part of pipe cover package.

Room thermostats control the central heating temperature. For maximum comfort it is recommended that your thermostat is set between 18 - 21°C.

RC05 Programmable room thermostat and boiler control

Code: 405

Compatible with discontinued Vokèra products for installation on an existing heating system. The RC05 can be fitted in an accessible location enabling direct control over the boiler.

The RC05 can also be used with the outside weather compensation control* to further increase efficiency and comfort levels. (Code: 2359259)

Facilitates remote reset.

Alarm codes and services icons displayed.

Regulates hot water and heating temperature.

3-modes of operation.

*Compact HE, Linea 7 and Compact SE only

External RF programmable room thermostat

Code: 411

This wireless programmable thermostat can be used with most Vokèra combination boilers and is ideal for retro fitting or to eliminate the need for wires.

Provides simple controllability and enhanced comfort.

50m external range, 30m internal range.

Receiver can be fitted inside boiler.

7 day - 24 hour - 5 and 2 day programmes ensures complete control over temperature and timings.

Contributes to energy savings as more precise instructions are transmitted than a standard clock or programmer.

For more information on the Vokèra Intelligent Control range please see the 'Energy Saving Control' leaflet
